Q4															
TOT															

This question paper consists of 15 pages and 1 page for rough work and calculations.

#### **RESOURCE MATERIAL**

- 1. An extract from the topographic map 2527CA RUSTENBURG (WEST)
- 2. Orthophoto map 2527 CA 15 TLHABANE
- 3. **NOTE:** The resource material must be collected by schools for their own use.

#### INSTRUCTIONS AND INFORMATION

- 1. Write your EXAMINATION NUMBER and CENTRE NUMBER in the spaces on the cover page.
- 2. Answer ALL the questions in the spaces provided in this question paper.
- You are provided with a 1:50 000 topographic map 2527CA RUSTENBURG (WEST) and an orthophoto map 2527 CA 15 TLHABANE of a part of the mapped area.
- 4. You must hand the topographic map and the orthophoto map to the invigilator at the end of this examination session.
- 5. You may use the blank page at the end of this question paper for all rough work and calculations. Do NOT detach this page from the question paper.
- 6. Show ALL calculations and formulae, where applicable. Marks will be allocated for these.
- 7. Indicate the unit of measurement or compass direction in the final answer of calculations, e.g. 10 km; 2,1 cm; west of true north.
- 8. You may use a non-programmable calculator.
- 9. You may make use of a magnifying glass.
- 10. The area demarcated in RED/BLACK on the topographic map represents the area covered by the orthophoto map.
- 11. The following English terms and their Afrikaans translations are shown on the topographic map:

ENGLISHAFRIKAANSDiggingsUitgrawingsRiverRivierCemeteryBegraafplaas

Protected Natural Environment Beskermde Natuurlike Omgewing

Technical College Tegniese Kollege

#### **GENERAL INFORMATION ON RUSTENBURG**

Rustenburg was established in 1851 as a central place town to support a fertile farming area producing citrus fruit, tobacco, peanuts, sunflower seeds, maize, wheat and cattle. The area became a primary agricultural region with vast citrus estates due to the favourable climate.

Rustenburg is home to the two largest platinum mines in the world and the world's largest platinum refinery, which processes around 70% of the world's platinum.

Lately, the vast citrus estates in the region have been in constant decline due to pollution from increased smelting and beneficiating processes by the mines. (Beneficiation is when value is added to the raw materials.)

Rustenburg has a temperate climate. It has very warm summers and mild winters. Due to the altitude, summers are not quite as hot as one might expect. Precipitation occurs mainly in summer.

Geography/P2 SC/NSC

### **QUESTION 1: MULTIPLE-CHOICE QUESTIONS**

The questions below are based on the 1:50 000 topographic map 2527CA RUSTENBURG (WEST) as well as the orthophoto map 2527 CA 15 TLHABANE. Various options are provided as possible answers to the following questions. Choose the answer and write only the letter (A–D) in the block next to each question.

1.1	Rust	enburg is situated in	
	A B C D	Gauteng. Limpopo. the North West. the Free State.	
1.2	The	contour interval on the orthophoto map is metres.	
	A B C D	5 10 20 25	
1.3	The i	map index of the topographic map, south-west of 2527CA RUSTENBURG,	
	A B C D	2527CC. 2526DD. 2527AC. 2526BD.	
1.4		grid reference/coordinates of trigonometrical station 256 in block <b>C1</b> on the graphic map is	
	A B C D	25°34'35"S 27°05'19"E. 27°05'35"S 25°34'19"E. 27°05'34"S 25°35'19"E. 25°34'23"S 27°05'33"E.	
1.5		approximate distance from <b>K</b> in block <b>H10</b> on the topographic map along ailway to Rustenburg in a south-easterly direction is km.	
	A B C D	1 1,5 2 2,5	
1.6	Strea	am L in block B2 on the topographic map flows in a direction.	
	A B C D	south-westerly northerly north-easterly southerly	

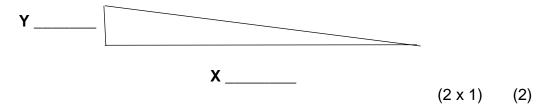

1.7	The o	climate of Rustenburg is mainly influenced by	
	A B C D	altitude. fronts. the ocean. aspect.	
1.8		ght the wind influences the temperatures of Geelhoutpark ( <b>H8</b> ) on the graphic map.	
	A B C D	anabatic katabatic onshore offshore	
1.9	The N	N4 passes through a in the Magaliesberg mountain range.	
	A B C D	ridge valley gorge gap	
1.10	Land	-use zone <b>1</b> on the orthophoto map is the zone.	
	A B C D	transition commercial residential industrial	
1.11	The p	ohysical expansion of Rustenburg in a westerly direction is mostly limited e	
	A B C D	cultivated lands. national road. mountain range. water features.	
1.12	Ruste	enburg was originally classified as a town.	
	A B C	central place specialised break-of-bulk trade and transport	

1.13		main activity within the Magaliesberg Protected Natural Environment on opographic map is part of the sector.	
	A B C D	primary secondary tertiary quaternary	
1.14	The	feature at <b>2</b> on the orthophoto map is a/an	
	A B C D	industry. mall. school. station.	
1.15		vertical aerial photograph from which the orthophoto map was produced taken between	
	A B C D	06:00 and 07:00. 10:00 and 11:00. 14:00 and 15:00. 18:00 and 19:00. (15 x 1)	[15]

## **QUESTION 2: MAP CALCULATIONS AND TECHNIQUES**

2.1	Refer to	the hiking trail in blocks A5 and B5 on the topographic map.
	2.1.1	Determine the 2020 magnetic bearing (MB) of the hiking trail from <b>M</b> to <b>N</b> in blocks <b>A5</b> and <b>B5</b> if the updated mean magnetic declination (MD) is 17°40' west of true north. Show ALL calculations. Marks will be awarded for calculations.
		Formula:  Magnetic bearing = true bearing + magnetic declination
		(2 x 1)
	2.1.2	Explain why it is important to use the magnetic bearing instead of the true bearing to determine direction on topographic maps.
		(1 x 1)
2.2	Refer to	the orthophoto map and answer the questions on gradient.
	2.2.1	Determine the average gradient of the slope for a truck that will transport its cargo (goods) from the industries at <b>3</b> (1 160 m above sea level) to the railway station at <b>4</b> (1 148 m above sea level) on the orthophoto map. Show ALL calculations. Marks will be awarded for calculations.
		Formula: Average gradient = vertical interval (VI) horizontal equivalent (HE)
		norizontal equivalent (HE)
		(5 x 1)

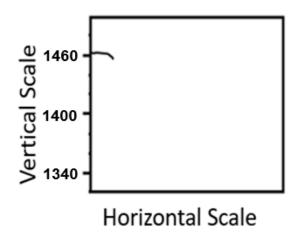

2.2.2 Fill in the correct values for **X** and **Y** in the space on the diagram below with regard to the answer to QUESTION 2.2.1.

2.2.3 Why will it be easy for the truck to transport its cargo over the calculated gradient?

 $(1 \times 1)$ (1)

- 2.3 Refer to the line drawn from spot height 1461 in block C1 to the ruin at O in block **C2** on the topographic map.
  - 2.3.1 Complete the rough cross-section below from spot height 1461 in block C1 to the ruin at O in block C2.

 $(3 \times 1)$ (3)

2.3.2 Is the ruin at O in block C2 intervisible from spot height 1461 in block C1? Answer YES or NO. Give a reason for your answer.

Yes OR No:

(1 + 1)

(2)

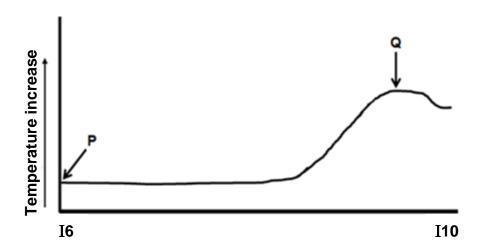

Copyright reserved Please turn over

Reason:

3	Calculate the vertical exaggeration (VE) of the cross-section between spot height 1461 in block <b>C1</b> and the ruin at <b>O</b> in block <b>C2</b> if the vertical scale is 1 cm represents 20 m.
	Show ALL calculations. Marks will be awarded for calculations.
	Formula: Vertical exaggeration = $\frac{\text{vertical scale (VS)}}{\text{horizontal scale (HS)}}$
	(4 x 1)

#### **QUESTION 3: APPLICATION AND INTERPRETATION**

3.1 The temperature graph below illustrates the general temperature change during the day from spot height 1614 (**P**) in block **I6** to the technical college (**Q**) in block **I10** on the topographic map.

3.1.1 The general trend of the change in temperature from **P** to **Q** is (increasing/decreasing)

3.1.2 Give a reason from the topographic map to explain the difference in temperature at **P** and **Q**.

3.1.3 Identify and explain ONE strategy that could be implemented by the local municipality in block **I10**.

Identification:	
Explanation:	
	(1 + 2)

(3)

Refer t	to the river system in block C7.
3.2.1	Identify the drainage pattern of the river system in block C7.
	(1 x 1)
3.2.2	State the underlying rock structure associated with the drainage pattern identified in QUESTION 3.2.1.
	(1 x 1)
3.2.3	Determine the stream order of the river system at point <b>R</b> .
	(1 x 2)
Refer t	to the stream flowing southwards in block <b>G4</b> .
3.3.1	In which stage of the fluvial cycle is the stream in block <b>G4</b> ?
	(1 x 1)
3.3.2	Give ONE piece of evidence from block <b>G4</b> to support your answer to QUESTION 3.3.1.
	(1 x 1)
Refer t	to blocks <b>C10</b> and <b>G7</b> on the topographic map.
3.4.1	Identify the street plans (patterns) at ${\bf S}$ in block ${\bf C10}$ and at ${\bf T}$ in block ${\bf G7}$ .
	Street plan S:
	Street plan T:
	(2 x 1)

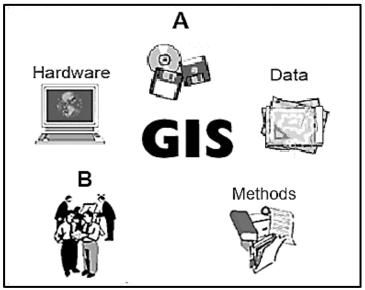

3.4.3 Give evidence from the topographic map for the development the street plan (pattern) at T.  (1 x  Refer to the mining activities of Townlands Platinum Mines on the orthopho map and topographic map.  3.5.1 Give ONE reason evident on the topographic map that indicate that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.	(2 x 1
3.4.3 Give evidence from the topographic map for the development the street plan (pattern) at T.  (1 x  Refer to the mining activities of Townlands Platinum Mines on the orthopho map and topographic map.  3.5.1 Give ONE reason evident on the topographic map that indicate that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.	Give evidence from the topographic map for the development of
the street plan (pattern) at <b>T</b> .  (1 x  Refer to the mining activities of Townlands Platinum Mines on the orthophomap and topographic map.  3.5.1 Give ONE reason evident on the topographic map that indicate that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.  (1 x  3.5.3 Discuss the positive impact that Townlands Platinum Mines has described in the street of the stree	- value evidence india nie naminandii: man in me nevelinom n
Refer to the mining activities of Townlands Platinum Mines on the orthopholographic map.  3.5.1 Give ONE reason evident on the topographic map that indicate that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.  (1 x  3.5.3 Discuss the positive impact that Townlands Platinum Mines has contained as the contained area.	
3.5.1 Give ONE reason evident on the topographic map that indicate that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x)  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.  (1 x)  (1 x)  (1 x)  (1 x)	(1 x 2)
that mining at Townlands Platinum Mines is practised on a larg scale.  (1 x  3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.  (1 x  (1 x)  (1 x)  (2 x)  (3.5.3 Discuss the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has contained as the positive impact that Townlands Platinum Mines has the positive impact	
3.5.2 Explain how mining activities at Townlands Platinum Mines cause an environmental injustice in the area.  (1 x )  3.5.3 Discuss the positive impact that Townlands Platinum Mines has considered as a constant of the area.	Give ONE reason evident on the topographic map that indicates that mining at Townlands Platinum Mines is practised on a large scale.
an environmental injustice in the area.  (1 x)  3.5.3 Discuss the positive impact that Townlands Platinum Mines has o	(1 x 1)
3.5.3 Discuss the positive impact that Townlands Platinum Mines has o	Explain how mining activities at Townlands Platinum Mines caused an environmental injustice in the area.
	(1 x 2)
the economic development of Rustenburg.	Discuss the positive impact that Townlands Platinum Mines has or the economic development of Rustenburg.

(2 x 2)

# QUESTION 4: GEOGRAPHICAL INFORMATION SYSTEMS (GIS)

# 4.1 **COMPONENTS OF GIS**

Geography/P2

A:	
B:	
	(2 x 1
Why is component <b>B</b> important in GIS processes?	
	(1 x 2
ocations (blocks <b>F10</b> and <b>H7</b> on the topographic map) hed for the development of a new cemetery. A GIS specialist ated by the local municipality to recommend the best sitespends.	ave bee has bee

ed for the development of a new cemetery. A GIS specialist ated by the local municipality to recommend the best sit opment.  Which of the TWO locations (block <b>F10</b> or block <b>H7</b> ) will	ave bee has bee e for thi

4.2.3	Give a reason for your choice of ONE of the data layers identified in
	QUESTION 4.2.2.

(1 x 2) (2)

4.3 Refer to block **J1** on the topographic map.

4.3.1 What is vector data?

4.3.3

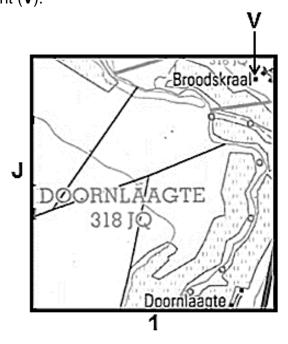

\_\_\_\_\_

 $(1 \times 1) \qquad (1)$ 

4.3.2 Give ONE natural line feature that the farmer used to determine the site of the cultivated land in block **J1**.

 $(1 \times 1) \qquad (1)$ 

- Agricultural activity in block **J1** on the topographic map is confined along the river.
- (a) Draw the symbol of the point feature that is used to extract ground water to increase water supply for agriculture, on the enlarged illustration of block **J1** below. This feature must be 40 mm southwest of the Broodskraal settlement (**V**).

 $(2 \times 1)$  (2)

15 SC/NSC

Explain the advantage of this specific location of the point feature drawn in QUESTION 4.3.3(a) for farming in the area.	
	-
(1 x 2)	- ) (
